

Scotts Valley Unified School District

State of California budget for 2011-2012 was based on projections of state revenue.

State of California budget for 2011-2012 was based on projections of state revenue.

The budget includes provisions for automatic spending cuts (triggers) that go into effect if revenue projections decline below the projections used at budget adoption.

State of California budget for 2011-2012 was based on projections of state revenue.

The budget includes provisions for automatic spending cuts (triggers) that go into effect if revenue projections decline below the projections used at budget adoption.

The Legislative Analyst's Office November projection and the Department of Finance December projection will be used to determine whether the triggers will go into effect.

Whether school districts see the affects this year or next year or both.....

It's all one problem.

It's all one problem.

The available solutions are the same.
